

At Lume, we offer a holistic strategy for IT services. With an agile, consultative approach to technology, our team enables business growth by customizing a suite of IT solutions that drive efficiency, effectiveness, and workforce productivity. **Our mission: To provide proven IT solutions in an unpredictable world.**

Our custom-fit IT solutions

Solution Center

Serves as your single point of contact for all IT support, including helpdesk, project, and technology upgrades.

Deployment

Designs end-to-end deployment solutions to procure, prepare, install, and maintain technology systems and platforms.

Virtual CIO

Provides specialized tactical and operational recommendations to assist in devising critical IT initiatives for your organization.

Cybersecurity

Offers a layered security model to provide comprehensive information security strategy through a Defense in Depth (DiD) model.

Cloud Continuity for PCs

Protects critical PC data from ransomware attacks, loss or theft, hardware failures, and more by enabling automated PC backups.

Business Continuity and Data Recovery (BCDR)

Works to avoid potentially devastating system failures, natural disasters, and human errors through reliable data recovery strategy.

“The Lume team has consistently risen to the challenge to help our organization plan and implement technology solutions that facilitate our operational efficiency and corporate compliance.” – CEO of a medical practice
