

# Windows 11 Migration

Preparing your business for Microsoft's product retirement

Microsoft is retiring Windows 10 and other legacy products. Businesses must prepare now to avoid security vulnerabilities and operational disruptions.

## Key deadlines

**Windows 10 support ends**  
No more security updates, patches, or technical support

**Windows 11 available**  
Upgrade to maintain security and receive ongoing support

**Legacy Office products**  
Various Office versions losing support throughout the year

**70%**

of businesses still use Windows 10

**100%**

security risk without updates

**12**

months until support ends

## How Lume Strategies can help

Comprehensive review of your current Microsoft products and retirement timeline identification.

Tailored roadmap with clear steps and timeline to minimize operational disruption.

Seamless transition to Windows 11, Microsoft 365, and modern cloud-based solutions.

**>40%**

of enterprise workstations are incompatible

## Why act now?

Maintain protection against cyber threats

Smooth transition without operational surprises

Avoid rush fees and emergency solutions

Time for proper training and adaptation

As of mid-2025, there have already been 190 new vulnerabilities reported for Windows 10.

## Industry specific compliance

### Healthcare (HIPAA)

Protected Health Information (PHI) must be secured. Non-compliance due to outdated systems can result in fines from \$100K to \$1.5M per incident.

### Finance (GLBA, PCI DSS, SOX)

Financial institutions face fines up to \$500K per PCI DSS violation and legal liabilities under SOX.

### Insurance (NYDFS 23 NYCRR 500)

Non-compliance can lead to regulatory fines and license revocation.

### Legal (ABA Guidelines)

Breaches can violate attorney-client privilege, leading to malpractice lawsuits and reputational damage.
